

COLONY OF FROGS DIES FROM ELECTRIC SHOCK

BRAMPTON, Ontario, June 17.—Citizens of this city are in a fair way to become satiated with fish and frog legs as a table delicacy as a result of the breaking of a high-powered hydro-electric cable today. The wire, carrying 5,000 volts, fell into the Etobicoke river, electrocuting fish and frogs literally by the thousand.

All day today for a distance of a mile or more up and down the river, the water was covered with the victims of the electric current. Virtually the entire frog colony, and it was a large one, made its first and last acquaintance with electricity.

Dinner tables this evening were loaded with the finest specimens, while butcher shops were threatening to close, owing to lack of patronage.

GIANT PARADE TO MARK ANTI-BLUE LAW REBELLION

Five days of anti-blue law demonstration, with an immense parade as the climax, will be staged in Washington, October 1 to 5, under the Anti-Blue Law League of America.

One thousand members of the National Council of the League will assemble and form a nucleus for the demonstration. The big parade will take place Tuesday, October 4, moving along Pennsylvania avenue from the Capitol to the White House. All opposers of Sunday legislation are expected to join the marchers.

Congressmen and Senators will have a busy five days dodging anti-blue law advocates, who will devote a day to swarming over the Hill, seeking whom they may buttonhole and talk into submission.

RULER OF SOUTH CHINA ASKS U. S. FOR PROTECTION

Sun-Yat-Sen Appeals to Harding for Recognition of Constitutional Government.

By International News Service.

Appealing to America as the "mother of democracy" and the "traditional friend" of China, the South Chinese government of Dr. Sun Yat-sen formally asked the United States today for recognition of the constitutional government of China. The request was contained in a letter from Dr. Sun Yat-sen to President Harding.

The North China government, Dr. Yat-sen set forth, is completely in the hands of the militarists and those who would force China against the will of the people to accept the twenty-one demands of Japan.

"China is now in the most critical time of her existence," wrote the aged Chinese leader. "Whether democracy triumphs or falls much depends upon the decision of America. This time we look again to America to support and uphold the will of the Chinese people."

"The internal condition of China has gone from bad to worse. While the people of North China are dying by the millions from starvation plenty of food is being hoarded in the hands of the militarists for their own use. This is proved by the fact that while some foreign philanthropists offered a large quantity of rice to relieve the famine situation, the Chinese Famine Relief Society declined the offer in kind, but requested in its stead the equivalent in money."

Texan Says He Found \$73,000,000 in Mexican Cave

By International News Service.

SAN ANTONIO, Tex., June 16.—Adam Fischer, of this city, has just returned to the States from a successful ten-year search for hidden wealth in the heart of the mountains of Mexico. Fischer claims to have located a much sought-after cave, where he says over \$73,000,000 worth of gold and silver bullion and Spanish octagonal dollars have been concealed since the early part of the nineteenth century. He is waiting a concession from the Mexican government in order to bring out the huge treasure he claims to have located.

Fischer asserts as his belief that bandits, captured the treasure trove while it was being moved to a place of safety by agents of the old Spanish government.

HUGHES NOTE TO SOVIET RAPPED AS CAPITALISTIC

Red Press Refers to Document As Letter and Not Reply.

For the first time since Secretary Hughes' reply to the Soviet appeal for resumption of trade relations was dispatched on March 25, references to that correspondence are beginning to appear in the Soviet press and in the speeches of Soviet leaders, according to advices here today.

Reports indicate that neither of the documents has been given out textually, but both have been mentioned by speakers, and in a few instances writers in the Bolshevik organs have quoted excerpts from the Hughes communication in the course of articles dealing with the possibilities of trade with the United States.

The tone of these references is generally sarcastic and the reply is characterized as what might have been expected from "Capitalistic America."

In every instance, the Bolshevik orators and writers studiously avoid giving the impression that there has been an exchange of communications between the Soviet government and the American Government.

FAKE TICKETS FOR BIG FIGHT BRING ARRESTS

READING, Pa., June 17.—Fake reserve seat tickets of the \$20 and \$30 denomination for the coming Carpenter-Dempsey championship battle at Jersey City, July 2, were offered for sale here by two alleged Philadelphia swindlers today.

Joseph S. Schwartz, thirty-four, of South Robinson street, and William J. Morrow, Fernon street, Philadelphia, were arrested in the lobby of a local hotel by Detective St. Clair, of the Reading police department, offering ten tickets each of the \$20 and \$30 denomination for \$400 in cash and later for \$400. The defendants, who are charged with suspicion on swindling, were taken before Magistrate Focht, and are held for a hearing Saturday.

BLACKSMITH IS KILLED AS CYANIDE EXPLODES

PATERSON, N. J., June 17.—Joseph Edwards, a blacksmith employed by the East Jersey Pipe Corporation, was heating some cyanide of potassium at the plant, when it exploded. Edwards died from his injuries five minutes after he had been admitted to the Paterson General Hospital.

SAYS SCIENCE WILL MANUFACTURE MEN WITHIN 200 YEARS

Creation of Organic Life by Artificial Means Now Possible, Declares Savant.

If you are living a couple of hundred years hence, don't be startled if you see a sign something like this: "Smith, Jones & Co., Manufacturers of Rats, Birds, and Humans. Name your species. Prices reasonable."

Professor Austin Clark, head of the biological department of the Smithsonian Institution, declared that scientists of the future will be able to "manufacture men."

Clark was asked to comment on the announced discovery by French savants of a method of creating organic life from certain quartz and meteoric stones.

"Maybe it's true, maybe not," said Clark.

BUILDING HUMANS POSSIBLE.

"Many able scientists have been fooled into believing that they have created 'life.' Nearly every other salient mystery of biology has been solved except this one supreme puzzle. It is now possible to construct all organisms of a living creature. They are chemically and anatomically perfect—but they won't work when it comes to 'living.' If this problem has not now been solved, it will be some day."

MODIFICATION LIMITED.

"If a primitive form of life can be created, we now know that we could modify and develop that form to any form of higher animal life. The external circumstances that created the different species of life are now known and can be artificially applied. The reason that we cannot take the so-called simple forms of life now and develop them into higher animals is that there are no real primitive forms of life left on the earth. The simplest animalcule has developed from the common starting point into a tremendously complex being. A hundred million years of heredity has fixed its life form and traits until artificial modification is now very limited."

MISTAKES MEAN FREAKS.

"This would not be true of newly created life. Such an organism would be tremendously impressionistic. It would mould and develop under the stimulus of artificial conditions as plastic clay in the hands of a sculptor. Practically any form of life now existent could be created from this primitive cell."

"It would probably take a couple of million generations to produce an animal like a dog or man," said Clark. "But the length of life of each generation could be speeded up, and the whole transformation got through within say 200 years."

"No doubt a lot of monstrous freaks would be created by mistakes in administering the stimulus."

PRESENT COAL RATES TO LAST SIX MONTHS

No reductions in freight rates on coal are expected within four or five months, was the view in high official quarters today.

The railroads, resisting every proposal to scale down the rates, were said by officials today to be the chief stumbling block to cuts in coal costs, through the medium of lower rates.

Many Administration officials believe that speedy passage of the Frelinghuysen "seasonal" coast rate bill would afford relief for consumers. Coal rates, and rates on other basic commodities, probably will not be readjusted until after fall. By that time recovery of business in all lines of industry, officials believe, will be so substantial that agreements between shippers and carriers can be more readily arranged.

WOMEN SMOKERS FLAYED IN ADDRESS TO W. C. T. U.

PHILADELPHIA, June 17.—Girls and women who puff cigarettes were verbally lashed by Miss Mary B. Mackin, addressing the Women's Christian Temperance Union of Philadelphia county at the opening of the thirty-seventh annual convention of the association in Sayers Memorial Methodist Church, Sixty-first and Catherine streets, yesterday.

"Young Christian women, smoking cigarettes! I shall never forget the horror of it!" exclaimed the speaker, in reciting experiences with women smokers.

"During a membership drive of the Young Women's Christian Association last fall I was shocked to see girls and women retire to the foyers of the Ritz-Carlton and indulge in this vile habit. Think of it!"

LOLITA ARMOUR PRIZES CRIPPLES' BRIDAL GIFTS

CHICAGO, June 17.—The Armour summer home on Lake Forest is filling with bridal gifts for Lolita Armour, who is to be married Saturday to John J. Mitchell, Jr., gifts from all parts of America and Europe.

Many of them have come from crippled children. Miss Armour has helped and these she prizes highly. The gifts will not be placed on exhibition. The bride will wear the simplest kind of a wedding gown, her only jewelry being a string of pearls given to her in childhood.

The Pains and Aches of Summer Time

Summer sports with unaccustomed exercise such as long hikes, rowing, tennis, baseball, etc., make sore muscles and sometimes cause sprains and strains.

These pains and aches will be quickly relieved by applying freely Sloan's Liniment, and you will be fit as a fiddle for the next day's work or play.

Sloan's Liniment

FIVE ARE KILLED WHEN AUTO DROPS OVER BRIDGE

UNIONTOWN, Pa., June 17.—Five persons were killed and five injured yesterday afternoon when an overloaded automobile, descending the Dutch Hill road near here at high speed, slipped the abutment of a bridge at the foot of the hill, overturned and alighted in a creek under the bridge. Three of those killed were members of one family.

The automobile was owned and driven by Arthur Newhouse. Six members of another family were riding in the tonneau and Newhouse, his wife and their two-year-old daughter occupied the front seat. Mrs. Newhouse, carrying the eight-month-old child in her arms.

When the Uniontown Hospital ambulance, carrying the injured, was returning from the accident it struck Mrs. May Luther, watchwoman at the Fayette street crossing of the Pennsylvania railroad. She sustained a fractured leg and was placed aboard the ambulance and taken to the hospital.

As a result of more open-air sports British women are developing larger waists and flatter chests.

ARMY CAPTAIN ALSO PRIZE SCHOLAR OF G. U.

Capt. Logan N. Rock is one of the busiest members of the staff in the office of the judge advocate general of the War Department, but he has found time during the past year to take a post-graduate course in the Georgetown University Law School.

Here's what came of his efforts: First prize for the best treatise on "Ethics of International Law," a parchment setting forth the fact that holds the degree of master of laws. He will continue his work in the War Department.

LANSBURGH & BROTHER
